

How much beer would be needed if legal drinkers in each state were only allowed to drink local beer in 2018?

Only 1/3 states' total beer production in 2018 can fulfill the local beer crave, but US in total produces more than 30% more beer than US adult citizens drink in 2018.

Yellow bar is the total beer production in that state, and the white bar is the beer in demand.

Number of bubbles represents the number of gallons consumed per person in each state.
